

Pixelitis

Your Treatment Options

Pixelitis is a serious illness that usually causes blindness.

There are three treatment options for Pixelitis.

Here you can learn about these options and figure out which one is right for you.

	No Treatment	Abbatide	Benedent
What do I do ?	You have no treatment	You take a pill when you wake up every day for two weeks	You take a pill when you wake up every day for two weeks
How many people who choose this have:			
permanent blindness (can no longer see) within one year?	90%	5%	5%
severe diarrhea (watery bowel movements) while taking the pills?	Does not apply	1%	25%
severe vomiting (throwing up) while taking the pills?	Does not apply	25%	1%
How much does it cost ?	There are no treatment costs	Two weeks of pills usually costs around \$12	Two weeks of pills usually costs around \$12
